

CURRENTLY SOLVED DOCTORAL THESES

Title: Epidemiological study of the occurrence of selected tick-borne diseases in the context of climatic and ecological changes in the human population.

Doctoral student: Mgr. Antónia Lamiová

Study program: Epidemiology

Form of study: full-time (2024-2028)

Supervisor: prof. MVDr. Monika Halánová, PhD.

consultant: MUDr. Zuzana Kalinová, PhD.

Title: Epidemiological and clinical aspects of nosocomial infections in critically ill children

Doctoral student: MUDr. Pavel Fedor

Study program: Epidemiology

Form of study: external (2022 – 2027)

Supervisor: doc. MUDr. Ingrid Urbančíková, PhD., MPH

Title: Epidemiological aspects of Chlamydia pneumoniae infection: risk factors and diagnostic possibilities.

Doctoral student: MUDr. Viera Pencáková

Study program: Epidemiology

Form of study: external (2022 – 2027)

Supervisor: Prof. MVDr. Monika Halánová, PhD.

Title: Active surveillance of carbapenemase-producing enterobacteria in the conditions of a university hospital.

Doctoral student: Mgr. Ladislav Tomčo, MPH

Study program: Epidemiology

Form of study: external (2021 – 2026)

Supervisor: Prof. MVDr. Monika Halánová, PhD.

Title: Oral health, cardiovascular risk factors and coronary angiographic findings

Doctoral student: MDDr. Jakub Jánošík, MPH

Study program: Epidemiology

Form of study: external (2021 – 2026)

Supervisor: Prof. MVDr. Monika Halánová, PhD.

Specialist Supervisor trainer: Prof. MUDr. Daniel Pella, PhD.

Title: Epidemiology and ecology of tick-borne encephalitis in Slovakia

Doctoral student: MVDr. Tomáš Molčanyi

Study program: Epidemiology

Form of study: external (2020 – 2025)

Supervisor: MUDr. Zuzana Kalinová, PhD.

Title: Research of new warning system methods in epidemiology using biological monitoring of municipal and hospital wastewater

Doctoral student: MVDr. Vladimíra Turčok Šimová

Study program: Epidemiology

Form of study: full-time (2020 – 2024) – interrupted study

Supervisor: Prof. MVDr. Peter Juriš, CSc.

Title: **Multiresistant enterobacteria in clinical material**

Doctoral student: Mgr. Mária Nagyová

Study program: Epidemiology

Form of study: external (2017 – 2021) – interrupted study

Supervisor: Prof. MVDr. Monika Halánová, PhD.

Title: **Analysis of risk factors and anti-epidemic strategy for the occurrence of carbapenemase-producing enterobacteria in a model inpatient medical facility**

Doctoral student: Mgr. MUDr. Juliana Pašková, MPH

Study program: Epidemiology

Form of study: external (2016 – 2021) – interrupted study

Supervisor: Prof. MVDr. Monika Halánová, PhD.
