

Instructions to exam in subject Physical and Rehabilitation Medicine

In taking the exams, adhere to the following regulations and instructions:

First, register for the examination in AIS and choose from the examination dates announced by the subject guarantor.

The exam will be administered online via Outlook forms. You will receive the link to your address given by UPJŠ.

You can enter the form to complete the exam, which will be conducted in writing, online at a specific date and time, i.e. **you will only have access to the completion of examination test on a specific date and for a specific period of time.** Time of examination is governed by the current time zone in Slovakia, i.e. students who are in a country with a different time zone have to follow the time in Slovakia and have to adapt to it.

The student must be well prepared in advance to technically carry out the exam, get familiar with the work system and make sure that he/she is able to access and turn on the examination test for a particular subject exactly at a specified date and time. Responsibility for timely connection and failure of connection before or during the exam, etc., lies with the student and cannot be justified.

You will be allowed to perform the tests exclusively via your **e-mail addresses, which have been given to you from UPJŠ.**

The final grade will be a synthesis of the evaluation of the test result as well as your activities during the semester.

We ask for your cooperation and patience and also to strictly follow all the above mentioned instructions.
